

We pay for the services of XM Radio and the assurance that we can (and should) access information regarding weather and other various optional stations, such as obtaining information on traffic situations. This is not offered elsewhere. Please, I respectfully urge you (FCC) to prohibit the passing of the National Assoc. of Broadcasters petition 04-160.

The National Assoc. of Broadcasters should not have the ability to ban the kind of programming we pay for and count on and frankly, deserve.

Thank you for your consideration on this matter.
